**PROTECTED AREAS LISTING UNDER SPAW PROTOCOL**

**PILOT PROJECT REPORT**

ATTACHED IN ANNEX:

- REVISED DRAFT PROPOSAL OF THE ANNOTATED FORMAT FOR THE PRESENTATION REPORTS FOR THE AREAS PROPOSED FOR INCLUSION IN THE SPAW LIST
- MAIN MESSAGES SENT BY THE SPAW-RAC DURING THE PILOT PROJECT

## **I. INTRODUCTION :**

At the fourth Meeting of the Scientific and Technical Advisory Committee (STAC 4) of the Contracting Parties (COP) to the Protocol Concerning Specially Protected Areas and Wildlife (SPA) in the Wider

Caribbean Region (Gosier, Guadeloupe, France, 2 – 5 July 2008), the workplan (biennium 2008-2009) set out the priorities for the Regional Programme on Specially Protected Areas and Wildlife in the Wider Caribbean Region (SPA).

One of the three objectives of the sub-programme "2.3 Development of Guidelines for the Management of Protected Areas and Species" of the workplan is to promote and assist with the development and implementation of the guidelines on protected area establishment, management and listing developed under the framework of SPA.

The first activity (number 19) to be implemented during the biennium was the implementation of pilot activity to test the guidelines for the evaluation of protected areas to be listed under the SPA Protocol (UNEP(DEPI)/CAR WG.31/3.Rev.1), collaborating with the SPA/RAC, the SPA Parties and regional experts to identify, interested

Parties, for a pilot activity to test the proposed guidelines with a view to develop a cooperation programme and regional MPA network in the long-term, and integrate as appropriate the socio-economic guidelines.

At the fifth Conference of the Parties (COP 5) of the Protocol concerning Specially Protected Areas and Wildlife (SPA) in the Wider Caribbean Region in Antigua on 8 September 2008, the Parties adopted the Guidelines and Criteria for listing Protected Areas under the SPA Protocol. The Parties also decided at that time to initiate the listing process through a pilot project to help assess the guidelines and criteria, as well as the format for listing.

In order to assess the compatibility of Caribbean protected areas with SPA protocol requirements, the pilot project aimed to test the applicability of the criteria and of the proposed outline format for reports before launching a wide appeal for countries to submit their protected areas to SPA.

In this context, Parties members of the E-group ("PA Criteria" group) on this matter established since 2007 were consulted on the approach to develop and undertake such pilot project, on the scale of a few Caribbean protected areas looking to test criteria and the initial annotated format.

Given the enthusiastic responses and comments received, the Secretariat decided to proceed with this activity, under the leadership and coordination of the SPA Regional Activity Center in Guadeloupe.

## **II. IMPLEMENTATION OF THE PILOT PROJECT :**

### **II.1 Chronology:**

September 2009: Reactivation of the "PA Criteria" E-group (Marine Protected Areas experts) under the coordination of the SPA-RAC and proposal to the E-group to initiate the pilot project towards the listing of Protected Areas under the SPA protocol. Agreement on the process and steps for the pilot project.

October 2009: Call to SPA Focal Points to invite them to propose their Protected Areas for listing under the pilot project mechanism by November 15th. The selection was to be done by the Secretariat keeping in mind geographical balance and ecological representativeness.

November 2009: Extension of the delay for the Parties to answer, with a new deadline fixed to the 31st, December.

January 2010:

The Secretariat receives nine proposals of Protected Areas from five countries, and all are accepted for participating in the pilot project.

The selected protected areas are:

From Belize: - the Hol Chan Marine Reserve, and the Glover's Reef Marine Reserve,

From Colombia: - The Sanctuary Ciénaga Grande de Santa Marta, and the Regional Seaflower Marine Protected Area " in San Andrés,

From France: - the Grand Connétable Island Nature Reserve (French Guyana) and the Guadeloupe National Park – (Grand Cul de Sac Marin),

From The US:- the Florida Key National Marine Sanctuary (FKNMS),

From the Netherlands Antilles: - the Bonaire National Marine Park and the National Park the Quill and Boven.on St. Eustatius.

Launch of the pilot project: the Secretariat invites the selected parties with their designated managers to try to complete the initial annotated format for their respective proposed PA, providing as much as possible of the data required in the different fields of this format, regarding the time needed to fill this format, on potential redundancies inside the format, and on potential difficulties to understand or give requested information.

January 2010: Opening of a E-Forum by the SPAW-RAC to help the managers complete the initial annotated format and to exchange on their difficulties, critics or suggestions, with the support of the PA Criteria working group.

( <http://forum.car-spaw-rac.fr/register.php>)

Mid-february 2010: first review among the group of managers participating in the pilot project with the SPAW-RAC to evaluate the process. The deadline to fill the format and send their feedbacks is set by the Secretariat to mid-march 2010.

Mid-march 2010: The managers involved under the control of their national focal points start to submit their reports to the Secretariat, and it is proposed to extent the delay to the 31st march.

April 2010: All the reports with their comments (suggestions, critics, difficulties) are transmitted to the PA Criteria working group under the coordination of the SPAW-RAC to compile the remarks and start to make the review with the amendments necessary to improve the initial annotated format. The next paragraph lists the main comments received by the nine Protected Area managers on the initial Annotated Format.

May 2010: development of the revised annotated format with a small sub-group of volunteers from the PA Criteria working group in a collective brainstorming, with the principal objectives to be more simple and a user-friendly tool that provides a real guidance according to the criteria. Below are listed the main objectives this working group tried to follow to revise and improve the Annotated Format.

June 2010: final presentation of the revised annotated format to the PA Criteria working group, with the synthesis of the comments and inputs, and validation.

The new format is shorter, with a gain of time to complete the new report significant, but without losing any information requested for the criteria and guidelines.

July 2010: Transmission to the Secretariat of the final report for the pilot project with the revised draft proposal of the annotated format for the presentation reports for the areas proposed for inclusion in the SPAW list, to be presented to the next COP 6 in October in Montego Bay, Jamaica.

## **II.2 Compilation of the main comments on the initial Annotated Format by the nine Protected Area managers who participated to the pilot project:**

- the format can be a useful document to help the Parties to submit their PA for inclusion in the SPAW list,
- it can become a real management and evaluation tool,
- the format must be clearer as regard the guidelines and criteria,
- the size of the format must be reduced and the format must be simplified,
- the level of details is too great, and there are redundancies,
- some data and information requested are neither easy to gather nor really useful,
- need to be more user-friendly (*see section II.3 and annex I*),
- to be more efficient, a web-based tool would be useful, in the three languages: English, Spanish, French, in which the managers and countries officers could progress in filling the report in stages (labelling stage by stage) (*see section II.4*),

## **II.3 Main objectives followed during the revision of the annotated format and orientations proposed:**

Classification of the fields in the format into different categories :

- general fields,
- mandatory descriptive fields that must be filled in all cases,
- fields directly linked with one or several criteria that were adopted,
- optional fields (interesting information but not directly linked with any criteria of the criteria and guidelines), fields with little added-value (either redundant with other ones, almost impossible to fill and/or very difficult for reviewers to interpret),

The main goal was to include in priority information needed to support the listing requirements. This to alleviate the burden, but also to ensure a core of comparable contents.

## **II.4. Development of the specific database and web-based tool to fill and send the reports**

In addition to the implementation of the pilot project itself and the consequent proposal of a revised annotated format, the group also discussed the relevance of developing a specific database to store the data contained in the submission report. Indeed the actual circuit foresees transmission of paper or pdf reports, but given the high number of PA that could potentially be submitted for listing under SPAW, it is essential to develop a tool to store the data provided through the reports, compile them and allow for specific statistics and analyses.

Hence it is recommended that a dedicated database is developed and managed by the SPAW-RAC, building on the CaMPAM's database. The data contained in CaMPAM's database could be used to pre-fill the SPAW PA database.

Many comments during the pilot project also pointed out that the format in its « .doc » version is not easy to deal with and that given the current technologies available it would be worth developing on-line submission of PA reports. It is thus proposed that a web-based tool is developed by the SPAW-RAC in order to offer the opportunity, for Parties that would wish so, to prepare and send their reports on-line without using the paper .doc format. The tool would allow for several assessment and validation steps by PA managers and governmental authorities before anything is sent to the Secretariat ; nor would anything be accessible/visible by anyone except the people in charge of preparing and reviewing the PA reports until the appropriate authority has given its approval.

A draft document of the requirements the web-based tool and the database must comply to will be presented for information at COP 6.

The web-based tool would present fields exactly corresponding to the sections and information requested in the annotated format and would allow for transmission of attachments as well.

### **III. REPORTS ON THE PROTECTED AREAS THAT PARTICIPATED IN THE PILOT PROJECT :**

The nine reports of the first annotated format completed by the Protected Areas managers who participated in the pilot project as part of the caribbean protected areas proposed for inclusion in the SPAW list can be found on (access limited):

- Belize - Presentation report for the "Hol Chan Marine Reserve",  
[http://www.car-spaw-rac.org/IMG/pdf/Belize\\_-\\_Hol\\_Chan\\_Marine\\_Reserve\\_-\\_annotated\\_format.pdf](http://www.car-spaw-rac.org/IMG/pdf/Belize_-_Hol_Chan_Marine_Reserve_-_annotated_format.pdf)

- Belize- Presentation report for the "Glover's Reef Marine Reserve",

- USA - Presentation report for the "Florida Key National Marine Sanctuary",  
[http://www.car-spaw-rac.org/IMG/pdf/USA\\_-\\_Florida\\_Key\\_National\\_Marine\\_Sanctuary\\_-\\_annotated\\_format.pdf](http://www.car-spaw-rac.org/IMG/pdf/USA_-_Florida_Key_National_Marine_Sanctuary_-_annotated_format.pdf)

#### **IV. RECOMMENDATIONS PROPOSED FOR CONSIDERATION BY SPAW COP 6**

Further to the implementation of the pilot project and the according revision of the annotated format, the recommendations that might be considered for adoption by SPAW COP 6 are the following :

- Adopt the revised annotated format as the final guidance document for Parties to present their reports of submission of Protected areas for listing under SPAW ;
- Request that the SPAW RAC develops, in close coordinationa with the PA criteria e-group, a dedicated database together with a specific web-based tool in order to allow Parties to prepare and send their reports on-line if they wish to ;
- Call all Parties to submit their respective Protected Areas for listing under SPAW, using the revised annotated format ;
- Consider favorably the reports prepared on the 9 Protected Areas that participated in the pilot project and consequently approve the listing of these first set of Protected Areas under SPAW.

#### **Number of messages sent on the pilot project by the SPAW-RAC for the Secretariat and members of the PA Criteria working group between september 2009 and june 2010:**

**ANNEX I : REVISED DRAFT PROPOSAL OF THE ANNOTATED FORMAT FOR  
THE PRESENTATION REPORTS FOR THE AREAS PROPOSED FOR  
INCLUSION IN THE SPAW LIST**

**OBJECTIVE**

The objective of this Annotated Format is to guide and help the Contracting Parties in producing reports of comparable contents as requested in Article 19 (2) of the SPAW Protocol, including the

information necessary for the adequate evaluation of the conformity of the proposed site with the Guidelines and Criteria for the Evaluation of Protected Areas to be Listed under the SPAW Protocol.

Under Article 19(2) the Parties shall establish a list of protected areas to create a regional network of protected areas and develop a cooperation programme. The purpose of this list is to identify those areas that are of particular importance to the Wider Caribbean region, that are to be accorded priority for scientific and technical research, and that are to be accorded priority for mutual assistance, and to protect the listed areas from activities that would undermine the purposes for which they were listed.

## CONTENTS

The Criteria and Guidelines for the listing of Protected Areas under the SPAW Protocol were adopted at SPAW COP 5 in October 2008. This report format's objective is to help the Parties identify the necessary information they must provide according to the Criteria and Guidelines, and help them present it in a way that allows comparisons and compilation.

The presentation report shall include the following main informations on:

(I) identification of the proposed protected area, (II) executive summary, (III) site description, (IV) ecological Criteria, (V) cultural and socio-economic Criteria, (VI) management, (VII) monitoring and evaluation, (VIII) stakeholders, (IX) implementation mechanism, (X) other relevant information.

## SUBMISSION OF REPORTS

The reports should be submitted by the Parties to the Secretariat of the STAC for SPAW two months before the next meeting of the STAC in English, Spanish or in French. The Secretariat may request assistance of the SPAW RAC in applying a standard evaluation process which may include external review, as appropriate.

Dossier should be compiled on A4 paper, with maps and plans annexed on paper. Contracting parties are also encouraged to submit the full text of the proposal in electronic form.

The requested annexes should be submitted on paper and, if possible, also in electronic form.

They are following:

- Copies of legal texts
- Copies of planning and management documents
- Maps as appropriate : administrative boundaries, zoning, land tenure, land use, and distribution of habitats and species, GIS shape files,
- Existing inventories of plants and fauna species (with latin names),
- List of the main publications and copies of the main ones concerning the site, and any relevant information available,
- If appropriate photos, slides, videos.

With respect to the Criteria and Guidelines, some fields below are mandatory. They are marked with a \*. Parties are invited to provide as well, to the extent possible, information for the additionnal fields. Correspondences between the information requested and the Criteria and Guidelines are presented.

Use of annexes and existing documents : for all sections below, if documents are already presenting the information that is requested, please attach them to your submission BUT please also provide a brief summary of the most relevant information in our core report (not only references like : see docXYZ section ABC page 123)

## **I. IDENTIFICATION**

**All those fields must be completed.**

\*a – Country:

\*b – Name of the area:

\*c – Administrative region:

\*d – Date of establishment:

\*e – If different, date of legal declaration :

\*f – Geographic location (include a separate annex with a geographical map as stated in the legal declaration of the area), and geographical coordinates (X,Y for the central point, WGS84, UTM projection system):

\*g – Surface of the area (sq.km):

\*h – Contact address (with the website location when existing):

## **II. EXECUTIVE SUMMARY**

Present briefly the proposed area and its principal characteristics, and specify the objectives that motivated its creation :

\* Explain why the proposed area can be proposed for inclusion in the SPAW list, and according to you, to which Criteria it is conforme (Criteria and Guidelines A/X and B§2):

**III. SITE DESCRIPTION (Criteria and Guidelines Section A/ II, VII, VIII and Section B)The fields in this section are necessary to justify the relevance of the proposed site according to the Criteria. Relevance of the site proposal according to one or several particular criteria should be more developed inside the specific sections IV ECOLOGICAL CRITERIA and V CULTURAL AND SOCIO-ECONOMIC CRITERIA. The Parties are encouraged to complete all the fields of this section, to the extent possible.**

\* a) Typology of the site

- Terrestrial surface under sovereignty, excluding wetlands (sq.km) :
- Wetland surface (ha):
- Marine surface (sq.km) :

b) Physical features

Brief description of the main physical characteristics in the area (geological, soil, topographic... and also such as hydrodynamics, volcanic formations, sand dunes, underwater formations, etc)

\* c) Biological features (attach in annex existing inventories of plants and fauna species with the latin names)

- Habitats: \*brief description of dominant and particular habitats (marine and terrestrial):

\*List here the habitats and ecosystems that are representative and/or of importance for the WCR (i.e mangroves, coral reefs, etc).

If possible detail for each habitat/ecosystem the surface it covers or, if it is not known with accuracy, provide a rough estimate of the surface (using an interval min<surface<max for example)

- Flora: \*brief description in a few sentences of the main plant assemblages significant or particular in the area:

\*Provide also the list of plant species within the site that are :

- In SPAW annex I
- In SPAW annex III
- In the IUCN Red List
- In the national list of protected species

Wherever possible give here an estimate of the population sizes for each species within the lists above.

- Fauna: \*brief description in a few sentences of the main fauna populations or of particular importance present (resident or migratory) in the area:

\*Provide also the list of plant species within the site that are :

- In SPAW annex II
- In SPAW annex III
- In the IUCN Red List
- In the national list of protected species

Wherever possible give here an estimate of the population sizes for each species within the lists above.

d) Human population and current activities

- Inhabitants inside the area or in the zone of potential direct impact on the protected area (permanent and seasonal number):

- \*Description of population, current human uses and development :

e) Other relevant features

(such as educational, scientific, research, historical or archeological features)

f)\* Impacts and threats affecting the area within and around the area

The list below is given only as a guide ; Parties are free to report on other impacts and threats  
Please precise, if appropriate and if possible, which species and/or habitats are more particularly affected by the impacts and threats.

- Exploitation of natural resources (fishing, tourism, agriculture, forest products, others..):
- Pressure linked with an increased population and infrastructures, and if relevant historic and current conflicts:
- Threats to habitats and species (including, if necessary, a paragraph on possible or existing Invasive Alien Species):
- External pollutions (solid waste, bad assessment, ..) :
- Other external threats (natural and/or anthropogenic) :

g) Expected trends of the impacts and threats listed above

Please explain, to the extent possible, how the impacts and threats presented in f) are expected to evolve in the short-term and the mid-term.

h) Information and knowledge available

Briefly describe the extend of knowledge of the area (attach a list of the main publications):

#### **IV. ECOLOGICAL CRITERIA (Criteria and Guidelines Section B/ Ecological Criteria)**

**Nominated areas must conform to at least one of the eight ecological Criteria.**

**Describe how the nominated site satisfies one or more of the following Criteria.**

**(attach in annex any specific and relevant documents for it )**

- a) **Representativeness** - The area includes physiographic features, populations of species, habitats and ecosystem types or ecological processes that are representative of the country, region or eco-region:
- b) **Conservation value**- The area contributes to the conservation, including management, of the species, subspecies or populations of flora and fauna present in it, either as permanent residents, or during some life cycle stages, with the objective of preserving them as functioning members of their ecological communities, and preventing them from becoming threatened or endangered, both locally and throughout their range.
- c) **Rarity** - The area conserves unique or rare species, habitats, or ecosystems. An area or ecosystem is rare if it is among the few of its kind in the country or Wider Caribbean region or has been seriously depleted across its range. The area may contain habitats that occur in a limited area, or rare, endemic, threatened or endangered species that are geographically restricted in their distribution.
- d) **Naturalness (Level of disturbance)** - The area has to a high degree been protected from or has not been subjected to, human-induced change, and the natural environment is thus relatively free from biophysical disturbance caused by human influence.
- e) **Critical habitats** - The area contains populations, habitats or ecosystems that are critical to the survival and/or recovery of endangered, threatened or endemic species, or to species listed in Annex I, II or III of the Protocol.
- f) **Diversity** - The area contains the variety or richness of species, communities, ecosystems, landscapes, seascapes and genetic diversity necessary for its long-term viability and integrity. This criterion is especially applicable where the area provides habitat for endangered, threatened, endemic and/or migratory species, and species listed in the Annexes to the Protocol.
- g) **Connectivity/coherence** -The area is adjacent to or ecologically connected to another protected area, or is within an ecological or biological corridor, and thus contributes to maintaining the ecological integrity of the Wider Caribbean region. This can apply for Protected Areas within one country or which transcend political boundaries.
- h) **Resilience** - The area contains biological components (habitats, species, populations) that have demonstrated the ability to recover from disturbances in a reasonable timeframe; or are naturally resistant to threats, such as climate change; and the protection of such areas enhances the recovery of damaged ecosystems elsewhere in the eco-region by providing a source of larvae and juveniles.

## **V. CULTURAL AND SOCIO-ECONOMIC CRITERIA (Criteria and Guidelines Section B/ Cultural and Socio-Economic Criteria)**

**Nominated Areas must conform, where applicable, to at least one of the three Cultural and Socio-Economic Criteria. If applicable, describe how the nominated site satisfies one or more of the following three Criteria ( attach in annex any specific and relevant documents for it ):**

- a) **Productivity** - The protected area helps conserve, maintain or restore natural processes that contribute to increasing the abundance of natural resources used by humans, and consequently contribute to regional sustainable development.
- b) **Cultural and traditional use** - The protected area has a special value in a regional context for the conservation, maintenance or restoration of the productivity and biological integrity of natural resources that provide for sustainable traditional or cultural activities, such as those of indigenous communities.
- c) **Socio-economic benefits** - The protected area has special value in a regional context for the conservation, maintenance or restoration of the productivity and biological integrity of natural resources that provide for economic or social benefits of user groups such as subsistence fishermen and rural communities, or economic sectors such as tourism.

## **VI. MANAGEMENT (Criteria and Guidelines Section C/I)**

**The protected area must be subject to a legal management framework, guaranteeing its effective long-term protection.**

**The management framework of the nominated site must be adequate to achieve its biophysical and socio-economic objectives.**

**With this purpose, describe the following management aspects for it.**

- a) \* Legal and policy framework (international, national, regional, and local level, attach in annex a copy of original texts, and give if possible the IUCN status):
- b) Management structure, authority
- c) \* Functional management body (with the authority and means to implement the framework):
- d) \* Objectives (clarify whether prioritized, if so indicate priority, or integrated, of equal importance):
- e) \* Brief description of management plan (and attach in annex a copy of the plan):
- f) Clarify if some species/habitats listed in section III/c) are more particularly targeted by management/recovery/protection measures
- g) Integration of the protected area within the country's larger planning framework (when applicable):

- h) Zoning, if applicable, and basic regulations between the zones (attach in annex a copy of the zoning map):
- i) \* Enforcement measures and policy
- j) \* International Status and dates(e.g. Biosphere Reserve, Ramsar Site, Significant Bird Area...):
- k) Relevant sustainable development measures or related plans in location:
- l) Available resources for the area
  - Human resources (total number, with details: staff, volunteers, partners):
  - Physical resources (equipments, infrastructures):
  - Financial resources and sources of funding (present and additional or expected in the future, and give annual budget)

\*Conclusion : Justify how the management framework described above is adequate to achieve the ecological and socio-economic objectives that were established for the site (**Criteria and Guidelines Section C/V**).

## **VII. MONITORING AND EVALUATION (Criteria and Guidelines Section C/II)**

**The protected area must include appropriate indicators and programs to measure management effectiveness and conservation success.**

**Describe how the nominated site addresses monitoring and evaluation, and what indicators are used to evaluate especially the impact of conservation measures on the status of species populations, habitats and ecological processes, within the protected area and its surroundings, as well as the impact of the management plan on the local communities.**

\* In general, how the nominated site addresses monitoring and evaluation:

\* What indicators are used to evaluate management effectiveness and conservation success:

Especially,

What indicators are used to evaluate the impact of conservation measures on the status of species populations, habitats and ecological processes, within the protected area and its surroundings:

What indicators are used to evaluate the impact of the management plan on the local communities:

## **VIII. STAKEHOLDERS ((Criteria and Guidelines Section C/III)**

**The local communities and the relevant stakeholders (institutions, public, decision-makers, economic sectors, scientific community, users, volunteers..) should be involved through inclusive and participatory processes in the planning and management of the protected area as appropriate. This participatory process should include institutional arrangements for the effective participation and empowerment of stakeholders and local communities.**

\* Describe how the nominated site involves stakeholders and local communities, and specify any coordination measures or mechanisms.

**You can use the list below if appropriate**

Institutions involvement:

Public involvement:

Decision-makers involvement:

Economic-sectors involvement:

Scientific community involvement:

Local communities involvement:

Others:

Coordination measures between stakeholders:

## **IX. IMPLEMENTATION MECHANISM ((Criteria and Guidelines Section C/IV)**

**With regard to the characteristics specific to each area, the management framework should include measures and provisions to achieve the goals, objectives, and address specific threats at that particular area.**

**\* Describe the mechanisms and programs that are in place in regard to each of the following management tools in the nominated site (fill only the fields that are relevant for your site):**

- a) Public awareness, education, and information dissemination programs:
- b) Capacity building of staff and management:
- c) Research, data storage, and analysis:
- d) Surveillance and enforcement :
- e) Participation of exterior users:
- f) Alternative and sustainable livelihoods:
- g) Adaptive management:

## **X. OTHER RELEVANT INFORMATION**

\*\*\*

## **CONTACT ADDRESSES**

Name(s), position(s) and contact address(es) of the person(s)

in charge with the proposal:

who compiled the report:

**SIGNATURE (S) AND DATE**

On behalf of the State(s) Party/Parties making the proposal.

ANNEX II :

MAIN MESSAGES SENT BY THE SPAW-RAC DURING THE PILOT PROJECT

----- Message original -----

**Sujet :** [PAcriteria] PA criteria group reactivated !

**Date :** Fri, 18 Sep 2009 16:36:32 +0200 (CEST)

**De :** franck gourdin <franck.gourdin.carspaw@guadeloupe-parcnational.fr>

**Répondre à :** PAcriteria@yahoogroups.com

**Copie à :** helene SOUAN <helene.souan.carspaw@guadeloupe-parcnational.fr>, emilie SPAW RCU <ew@cep.unep.org>, Alessandra Vanzella-Khoury <avk@cep.unep.org>

Dear PA criteria group members,

First of all thank you very much for your enthusiastic answers! I am happy and encouraged to be the coordinator of this group who will help to develop the pilot project towards the listing of Protected Areas under the SPAW protocol.

In the context of my first email, through the pilot project the adopted criteria and guidelines will be applied and the proposed annotated format will be used as appropriate. However, further inputs and guidance from you are strongly needed for this, and I am very eager to work with you on those issues.

In keeping with SPAW COP 5 decision, we propose that a broad call to Parties be made to propose their Protected Area for listing under the pilot project mechanism. Depending on the number of replies and interest a replimantry selection will be done of 4 or 5 PA to participate in the pilot project, keeping in mind geographical balance and ecological representativeness to make this preliminary selection.

We will then proceed to invite the selected parties to try to complete the annotated format for their proposed PA, giving as much as possible the information required in the different fields of this format. This should also assist the secretariat regarding the time needed to fill this format, on potential redundancies inside the format, and on potential difficulties to understand or give requested information. Once the annotated format is completed, I would suggest that the reports are transmitted to the secretariat for the review by this working group. This should provide insight to the group on application of the criteria, timing, difficulties on the assessment of the information in the annotated format etc.

If you are in agreement, we will send an official request to the parties to present a maximum of two PA to be considered by the secretariat for participation in this pilot project. The selection of PA to participate in the pilot project will be made by the secretariat (in consultation with the working group) based on geographical and ecological representation.

Furthermore, in order to support existing MPAs in this process, I will welcome your feedback on the use of the regional MPA database for this exercise. Do you think it might be useful to use existing database to alleviate the reporting task ? And/Or develop a data processing tool on a website to help parties complete the report format using the information already found in the database?

Please let me know if you are in agreement with this approach and do not hesitate to provide any feedback and comments on the proposed method.

I look forward to hearing from you!

Best regards,

Franck GOURDIN  
SPAW-RAC Project Coordinator"

Dear PA criteria group members,

Thank you for your first useful commentaries on the proposed approach. So I feel "easier" now, thanks to you!  
We will wait until the next wednesday (october 14th) to get some others feedback and comments from this group.  
Then, the Secretariat will send the broad call to Parties (duration one month, nov 15th max it's enough?)  
to propose their PA for listing under the pilot project mechanism (thank you Paul by advance!)

Best regards,  
Franck Gourdin.  
SPAW-RAC Project coordinator.

Dear SPAW focal points,

At the fifth Conference of the Parties (COP 5) of the Protocol concerning Specially Protected Areas and Wildlife (SPAW) in the Wider Caribbean Region in Antigua on 8 September 2008, the Parties adopted the Guidelines and Criteria for listing Protected Areas under the SPAW Protocol. The Parties also decided at that time to initiate the listing process through a pilot project to help assess the guidelines and criteria, as well as the format for listing. In this context, Parties members of the Egroup on this matter established since 2007 were recently consulted on the approach to develop and undertake such pilot project. Given the enthusiastic responses and comments received the Secretariat would like to proceed with this activity, under the leadership and coordination of the SPAW Regional Activity Centre. In order to launch the Pilot Project, the Secretariat now would like to invite each of you to propose one, or a maximum of two, Protected Areas established in your country and which you wish be part of the Pilot Project, along with the name and contact of the people you nominate to prepare the pilot reports for those Protected Areas. Answers should be sent to the Secretariat and the SPAW-RAC before November 15 (helene.souan.carspaw@guadeloupe-parcnational.fr and franck.gourdin@guadeloupe-parcnational.fr). The selection of Protected Areas to participate in the pilot project will then be made by the Secretariat keeping in mind geographical balance and ecological representativeness. The Secretariat will then proceed to invite the designated managers to try to complete the annotated format for their respective Protected Areas, providing as much as possible of the data required in the different fields of this format. This will also serve to provide the Secretariat and the SPAW-RAC with feedback on the practicability of this annotated format. Once the annotated format is completed, the reports should be transmitted to the Secretariat for review, with the assistance of the PA electronic working group.

Thank you for your prompt attention and follow-up. We look forward to hearing from you.

Sincerely,  
The Secretariat

Dear SPAW focal points,

I just want to invite you again to answer to the precedent email and to participate to the Pilot project, presenting one or two protected areas.

This is the best way to test both the annotated format proposed and the guidelines and criteria developed.

Thanks a lot for those who already sent us their proposal!

The dead line for it is still the 15th, november.

Sincerely,

for the Secretariat,

Franck GOURDIN  
Programme Officer  
Regional Activity Center for Specially Protected Areas and Wildlife  
(RAC-SPAW)

Dear Managers and SPAW focal points,

First, we wish you a happy and prosperous 2010 year of the biodiversity !

! Un feliz y prospero ano 2010, ano de la biodiversidad !

I thank you for your participation to this pilot project, and particularly those who proposed their Protected Area to try complete the annotated format with the designed managers.

We have received nine proposals from five countries, and all have been accepted:

Selected protected areas and managers:

Belize (2):

- the Hol Chan Marine Reserve (Manager: Miguel Alamilla: [mikeobze@yahoo.com](mailto:mikeobze@yahoo.com))
- the Glover's Reef Marine Reserve ( Alicia Eck : [alliekat\\_18@yahoo.com](mailto:alliekat_18@yahoo.com) )

Colombia (2):

- Sanctuary Grande de Santa Marta y Via Parque Isla Salamanca, with the Sanctuary El Corchal Mono Hernandez (Maria Fernanda Cuartas Rios: [mcuartas@parquesnacionales.gov.co](mailto:mcuartas@parquesnacionales.gov.co) )
- the Regional Seaflower Marine Protected Area, archipiélago de San Andrés, Providencia y Santa Catalina (Elizabeth Taylor Jay: [elizabeth.taylor@coralina.gov.co](mailto:elizabeth.taylor@coralina.gov.co) )

France (2):

- French Guyana: Grand Connétable Island Nature Reserve (Antoine Hauselmann: [antoine.hauselmann@developpement-durable.gouv.fr](mailto:antoine.hauselmann@developpement-durable.gouv.fr) , [grand.connetable@espaces-naturels.fr](mailto:grand.connetable@espaces-naturels.fr) et Rachel BERZIN: [rachel.berzins@oncfs.gouv.fr](mailto:rachel.berzins@oncfs.gouv.fr) et )
- The Guadeloupe National Park " Grand Cul de Sac Marin ( Denis Girou: [denis.girou@guadeloupe-parcnational.fr](mailto:denis.girou@guadeloupe-parcnational.fr) , Xavier Delloue: [xavier.delloue@guadeloupe-parcnational.fr](mailto:xavier.delloue@guadeloupe-parcnational.fr) )

USA (1):

- Florida Key National Marine Sanctuary (FKNMS) (lauren wenzel <[Lauren.Wenzel@noaa.gov](mailto:Lauren.Wenzel@noaa.gov)> with Annie Hillary: [Annie.Hillary@noaa.gov](mailto:Annie.Hillary@noaa.gov) and Katya Wowk: [Katya.Wowk@noaa.gov](mailto:Katya.Wowk@noaa.gov) )
- The Netherlands Antilles (2)

the Bonaire National Marine Park

and the (terrestrial) National Park the Quill and Boven on St. Eustatius.

Now, the Secretariat invite by this mail the designated managers by the focal points to try to complete the annotated format for their respective Protected Areas, providing as much as possible of the data required in the different fields of this format. So you will find attached the tested format and the guidelines in your language.

The SPAW focal points should control and verify the addresses of their designed managers.

We will make a first review of the group in mid-february. Once the annotated format is completed (or not, do your best, that's all !), the reports should be transmitted to the Secretariat for review in march.

Please tell us for any questions, difficulties, critics or suggestions. Do not forget that this will also serve to provide the Secretariat and the SPAW-RAC with feedback on the practicability of this annotated format. Le podemos contestar tambien en espanol si lo necesitan.

Sincerely,

for the Secretariat,  
Franck GOURDIN  
Programme Officer

Dear Managers,

One month has spent now since the beginnning of the Pilot Project.

So, it is time to make a first review: please tell us (by email return, or using the forum) how you're going to complete the annotated format in its different fields.

Particularly we need informations and feedback on: the time you needed to fill it, the practibility of this format if necessary, potencial redundancies inside it, your difficulties to understand or give requested information, your "feelings" and ideas to improve it if necessary, critics or suggestions.

We thank you once again for your participation!

Please don't forget that the reports should be transmitted by the SPAW focal points to the Secretariat for last review in march.

Un mes ha pasado desde el principio del proyecto pilote.

Entonces, es tiempo para hacer un punto sobre su avance: por favor necesitamos saber como adelantan para completar el formato (contestando a este correo o sobre el foro).

Mas precisamente, estamos esperando de su parte contestas sobre:el tiempo necesario para completar el formato, las dificultades para manejarlo, redundancias eventuales adentro, sus dificultades para entenderlo o para dar la buena informacion, y todas sus ideas, criticas o sugerencias para mejorarlo.

!De nuevo les agradecemos para su contribucion!

Por favor no olviden que el formato tiene que ser completado y transmitido por el intermediario de sus puntos focales del protocolo SPAW al Secretaria para el mes de marzo.

Sincerely, Saludos,

for the Secretariat,  
Franck Gourdin  
Programme Officer  
CAR-SPAW-RAC

Dear Managers,

The deadline for the report is fixed to mid-march.

We thank you all those who answered and worked so hard on the format !

I know how busy you are, so once again thank you for your contribution:

got to be certain your work will be useful for all of us...

Now it's time to send us (mid-march) using your national focal points (in copy) the format completed with all your feedback:

It means:

the time you needed to fill it, the practicability of this format if necessary, potencial redundancies inside it, your difficulties to understand or give requested information, your "feelings" and ideas to improve it if necessary, critics or suggestions. It's very important for us.

Parallel to that, please send us to the Secretariat and to the SPAW-RAC (My Director Helene Souan or I) by email return your format completed too.

We will send you sooner some feedbacks on your work.

La limite en el tiempo para completar el formato esta fijada al 15 de marzo.

! Les agradecemos todos para trabajar tan duro sobre este formato!

Sé como estan ocupados, entonces y una vez mas gracias por sus contribuciones: pueden estar seguros que su trabajo sera util para todos...

Ahora es tiempo (para el 15 de marzo) de mandar a su formato completado pasando por sus puntos focales nacionales (en copia), y con sus comentarios (el tiempo necesario para completar el formato, las dificultades para manejarlo, redundancias eventuales adentro, sus dificultades para entenderlo o para dar la buena informacion, y todas sus ideas, criticas o sugerencias para mejorarlo).

Eso es por lo menos tan importante para nosotros.

En paralelo a este envio oficial, por favor mandan el formato al secretario y al CAR-SPAW (mi directora Helene Souan o yo) utilizando tambien el correo electronico.

Les mandaremos proxicamente los resultados de su trabajo.

Sincerely, Saludos,

for the Secretariat,  
Franck Gourdin  
Programme Officer  
CAR-SPAW-RAC

(espanol abajo)

Dear Managers,

The deadline for sending us your reports on your protected areas was mid-march. This message is thus a last reminder ...

Many, many thanks to those of you that have already submitted your reports or told us that you planned to do so in the next few days!

Some of you asked me if it was possible to extend the deadline a bit, and I think it useful to share with you all the answer I made : if you're behind schedule, yes you can take a few more days to submit your final report, but please send us, by the beginning of next week, your draft report **at its current stage of preparation** as well as your comments and feedbacks on the exercise. We'll keep it only for our personal use at the RAC, without sending it to anybody if you don't want us to. Then you can send us the finalized report later.

The reason why I'm requesting that is because we need as soon as possible to have an overview on the results of the pilot project and compare and compile your remarks and comments. It will help us prepare with the PA working group the amendments necessary to improve the format. So even if you've not filled every field in the format, this is not a problem, this will still be very valuable information for us.

Once again, thank you so much for your participation in the pilot project and for all the time and energy you spent!

\*\*\*\*\*

Estimados participantes,

La limite en el tiempo para completar el formato estaba fijada al 15 de marzo. Este mensaje sirve como ultima noticia...

! Les agradecemos mucho a todos los que ya nos enviaron sus formatos o que nos decieron que lo harian en los proximos dias!

Unos participantes me preguntaron si era posible diferir un poco la limite, y pienso que seria util compartir mi contesta con todos. Si tienen retraso para completar el formato, pueden tomar unos dias mas antes de mandarnos su formato final, pero por favor mandennos la semana prÃ³xima su formato provisorio **en su estado de preparacion actual**, y tambien sus comentarios, criticas y sugerencias sobre el ejercicio. Guardaremos este formato provisorio solo para nuestro uso al RAC, sin difundirlo a otra gente si no lo desean. Luego podran enviarnos el formato final.

Solicito eso a Ustedes porque necesitamos el mas rapidamente posible tener una visiÃ³n global de los resultados del proyecto pilote, y comparar y recopilar sus comentarios y sugerencias. Eso va a ayudarnos preparar con el grupo de trabajo sobre Areas Protegidas las modificaciones necesarias para mejorar el formato. Mismo si no han completado cada informacion en el formato, no es un problema, serÃ¡ no obstante muy Ã³til para nosotros recibirlo ahora.

Una vez mas, muchas gracias a todos por su participaciÃ³n en el proyecto pilote y por todo el tiempo y toda la energia que pusieron en este proceso !

Sincerely, Saludos,  
for the Secretariat,

Helene SOUAN

*(français ci-dessous)*

Dear PA criteria group members,

the pilot project for the listing of protected areas under the SPAW protocol was launched in early January, with nine PA participating from Belize, Colombia, the US, France, the Netherlands Antilles. The deadline for the submission of their reports and comments on the format was mid-march, and I am very pleased to inform you that so far the SPAW-RAC has received six reports. Other managers told us that they needed a little more time, but that they would send their reports as soon as possible. I want to thank them warmly for their participation and their efforts.

Next week we will send you the reports for your information and review, as well as a compilation of the comments we received. We will also send you some proposals to progress quickly on the review of the reports and on the improvement of the format and the way to fill it and submit it.

Best regards

-----  
Estimados miembros del grupo PA criteria,

el proyecto pilote para la inscripción de las áreas protegidas en el Protocolo SPAW empezó al principio de Enero, con la participación de nueve áreas protegidas de Belize, Colombia, los Estados Unidos, Francia, y las Antillas holandesas. La límite en el tiempo para enviar sus informes y sus comentarios sobre el formato estaba fijada al 15 de Marzo, y estoy muy feliz informarles que el CAR-SPAW ha recibido ahora seis formatos. Otros participantes nos informaron que necesitaban un poco más tiempo, pero que nos mandarían sus formatos tan pronto como posible. Querria agradecerlos mucho para su participación y sus esfuerzos.

Les enviaremos los formatos la semana próxima para su información y examen, así como una síntesis de los comentarios que recibimos. También les haremos proposiciones para progresar rápidamente con el examen de los informes y el mejoramiento del formato y de la manera de completarlo y transmitirlo.

Saludos cordiales

-----  
Chers membres du groupe PA criteria,

le projet pilote pour l'inscription des aires protégées au titre du protocole SPAW a été lancé début Janvier, avec la participation de neuf aires protégées du Belize, de Colombie, des Etats-Unis, de France et des Antilles néerlandaises. La date limite pour la soumission de leurs rapports et de leurs commentaires sur le modèle de rapport était fixée à mi-mars, et j'ai le grand plaisir de vous informer qu'à ce jour le CAR-SPAW a reçu six rapports. D'autres gestionnaires nous ont indiqué qu'ils avaient besoin d'un peu plus de temps, mais qu'ils nous enverraient leurs rapports dès que possible. Je voudrais les remercier très chaleureusement pour leur participation et leurs efforts.

Nous vous transmettrons les rapports la semaine prochaine pour information et examen, ainsi qu'une synthèse des commentaires que nous avons reçus. Nous vous enverrons des propositions afin de progresser rapidement sur l'analyse des rapports et sur l'amélioration du modèle et de la manière de le remplir et le soumettre.

Bien cordialement,

Helene SOUAN

Dear PA Criteria group members,

Please forgive me for the delay, but i have so many things to read first!...

Now we have received all nine reports, thanks once again to our brave and heroic managers.

I'm working to make a compilation of the comments to send it to you quickly, but we already can say that:

- the format is a useful document for all , and has required investigations for all, and it can become a real management and evaluation tool, but with some improvements:
- the size of the format should be reduced and the format must be simplified (our managers won't work so hard any more!), and the level of details is too great,
- if we ask for the management plan, it's useless to make redundancies inside the format,
- it would be interesting to examine how some criteria could be considered as "optional",
- given the integrated nature of the problems in general with the land-sea interface, it is not easy to divide external and internal threats, conflicts and impacts,
- some questions are redundant,
- when asking quantitative datas, it might be beneficial to open to a qualitative description to get all the available information,
- the format must be clearer as regard the guidelines (criteria-requirements),  
(i'm still reading, but that's the idea!.. )

In order to be more efficient next time, it is clear we need a web-based tool for all the managers, in the three languages, in which they could progress in filling the report in stages (labelling stage by stage).

After that, PA Criteria group members, we would need to know if you are ready to work on the review of the reports in may, in order to share the work

(each one of the reports could be read by two experts of the group?)

Some of you hasn't answered for many months, some have gone away, some countries have no more representative experts actually inside the group (we are trying to join others),

so it would be useful to update the list first: you can do it answering this mail.

Please tell me if I need to translate in spanish.

Sincerely, Saludos,

for the Secretariat,  
Franck Gourdin  
Programme Officer

Dear PA Criteria group members and heroic managers,  
*Estimados miembros del grupo PA criteria,*

Now, with this nine reports completed (less one: please Alicia...), we have achieved the phase 1 of the pilot project: testing the proposed annotated format.

The work done to complete this format with your comments will be the base on which we can start working to analyse and improve it (second phase of the project).

Some managers already asked us to be involved in the second phase in May (thank you Nicole, Miguel, Bill).

*Ahora, con los nueve formatos anotados (menos uno: por favor Alicia...), hemos acabado la primera fase del proyecto pilote: testar el formato anotado propuesto.*

*Este primero trabajo para completar el formato con sus comentarios estara la base sobre cual podemos empezar la analisis y la mejora de eso (segunda fase del proyecto).*

*Unos encargados de areas protegidas ya nos preguntaron para estar involucrados en esta segunda fase en Mayo (Gracias Nicole, Miguel, Bill).*

We are now going on to compile your comments and remarks, but the principal idea is:

- The annotated format must be simplified and clearer as regard the guidelines (criteria-requirements). Some general informations will be "obligatory" in the beginning of the format (with some summaries for the important documents to join, and with a webtool to facilitate the fillings and the creation of a database), some others linked directly with some criterias too, but the other informations will be "optionnal". The fields of the format will be classified according to the criterias and guidelines.

We will work on this in May and June.

The Parties will decide first on which of the criteria their Protected Area meets and how, then will use the format where they will meet informations (targets, objectives...) and requirements (direct correlations) to help them to submit to those criteria.

If the Secretariat needs more informations to evaluate the Protected Area nominated by the Parties, the submitting procedure will be stopped, giving the opportunity to the Parties to get complementary informations.

Please tell us if you are in agreement with those first ideas.

*Estamos haciendo la compilacion y la sintesis de sus comentarios, pero la principal idea que esta saliendo es:*

*- El formato anotado tiene que ser simplificado, y mas claro sobretodo tomando en cuenta los lineamientos (criterios juntados). Unas informaciones generales estaran "obligatorias" desde el principio del formato (con resúmenes de los documentos principales que adjuntar, y con una herramienta sobre internet para facilitar el tratamiento de los datos con la creacion de una base de datos), otras informaciones obligatorias estaran directamente juntadas a los criterios, pero las otras informaciones estaran consideradas como "opcionales". El desarrollo logico interno del formato estara*

*pensado segun los criterios y sus lineamientos.*

*Empezaremos este trabajo en mayo y junio.*

*Las Partes tendran que decidir primero sobre cuales criterios su area protegida puede cumplir y como, y despues utilizar el formato donde encontraran informaciones (objetivos, como alcanzarles..) y correlaciones con los criterios para facilitar su nominacion.*

*Si la Secretaria necesita mas informaciones para evaluar la area protegida propuesta por los Partes, la procedura estara parada, dando asi la posibilidad a los Partes de buscar los infomaciones complementarias.*

*Por favor digannos si estan de acuerdo con estas primeras ideas.*

Sincerely, *Saludos*

Dear Nicole, Katya, Miguel, Lloyd and William,

Thank you for having answered so quickly, and to accept to take time on your working hours to help us improve the format.

We think that the first step to make a useful review of the format is to compare it more closely with the criteria and guidelines in order to determine how the format helps Parties report their PA under the criteria that were adopted.

The idea would be to classify the fields of the format under the following categories :

- general, mandatory descriptive fields that must be filled in all cases,
- fields directly linked with one or several criteria that were adopted. For example, if a party wants to submit a PA because it contains many rare, threatened species, then it might wish to emphasize this particular value of its area, according to ecological criteria c"rarity"of the criteria and guidelines. In this case priority should be given (beside mandatory information on area, location, status of the PA etc) to fields like "List of regionally important species", "main plant assemblages", "main fauna populations" ; but fields like "subsistence uses" are, although of course interesting, less important to justify the listing of the PA under SPAW
- optional fields (interesting information but not directly linked with any criteria of the criteria and guidelines),
- fields with little added-value (either redundant with other ones, almost impossible to fill and/or very difficult for reviewers to interpret),
- And eventually new fields to create that would correspond to gaps of the format regarding some criteria and guidelines (for example, if a Party wants to submit an area under the "resilience" criteria, it is very difficult to identify where this information should be provided in the format). Improving this could mean adding missing fields, splitting some fields into sub-fields or re-formulating existing fields to make them easier to understand and more to-the-point

This idea is to provide the Parties and the managers with a key to better understand how the format is to be used, that is to say which information they must concentrate on depending on the particularities of their PAs and the reason why they want to propose it for listing under the SPAW Protocol. As you know, it is stated in the criteria and guidelines that any submitted PA must fulfill AT LEAST one ecological criteria out of the 8 ecological criteria adopted, and IF POSSIBLE one or several socio-economic criteria. Hence this means that there is no need to meet ALL criteria ; but the format has been designed to take into account all possibilities, so it refers to all the criteria in the successive fields (directly sometimes, undirectly in other cases). That partly explains why it is so long and difficult, and that's why we feel we should better explain the purpose of each field of the format, so that the Parties can identify more easily the ones that are essential according to their own characteristics and priorities.

This sorting of the format fields into different categories criteria-related will also help us prepare the conversion of this .doc format into a real database.

So we propose to begin with this motivated little group. You send us your review of the format, we will do the same, then we compile and compare it to make a common synthesis that we will propose to all the participants of the pilot project (the PA Criteria working group and the managers already involved).

The objective would be to send us your first review for the 15th. Then we can organize a skype conf call to share our ideas and decide what to do next.

Let me tell you if you are in agreement with this, and if OK let's go!

Sincerely, Saludos

for the Secretariat,

Franck Gourdin  
Programme Officer  
CAR-SPAW-RAC

Dear Marion, Nicole, Katya, Miguel, Lloyd and William,  
thank you very much for your efforts and all your inputs!!!  
Sincerely, THANK YOU !

Thanks to you, I think we did a good job revising and simplifying the annotated format for reports on PA to be listed under SPAW.

Moreover, we're all on the same line re : the format, that's great : we all agree that it must be a simple, user-friendly tool that provides guidance to managers and countries officers when they want to prepare the submission of a PA to listing under SPAW, and not create an additionnal burden.

Please find attached a draft new format, that I tried to built by synthetising and compiling all your comments and inputs.

I look forward to hearing your feedbacks on that :

does it reflect well your proposals and comments?

If it does, I propose that I send it on our common behalf to the PA criteria e-group to present them with the results of our brainstorming and ask for their opinion.

Could you please let me know what you think about this new format by the end of next week, so that I can send quickly a message to the PA criteria e-group?

Once again, thank you so much for your help!

Best regards  
for the Secretariat,  
Franck Gourdin  
Programme Officer

Dear members of the PA criteria e-group

Further to the preparation of the reports on 9 protected areas for our Pilot Project and the comments we received from the managers that participated in this work, we created in april (30th) a small sub-group of volunteers to try and propose a revised annotated format.

Indeed, the comments we received during the Pilot Project all pointed out the need of a simpler, clearer format that would be more user-friendly, and above all more explicitly linked to the Criteria and Guidelines for PA listing under SPAW. We were told that these links were difficult to make, and that some data and information requested in the format were neither easy to gather nor really useful (or at least, it was difficult to understand how they could be used)

Taking the above elements in consideration, we worked with the sub-group to review the format and propose a new version. We follow the principles below :

We've tried to classify the fields in the format into different categories :

general, mandatory descriptive fields that must be filled in all cases,

fields directly linked with one or several criteria that were adopted. For example, if a party wants to submit a PA because it contains many rare,

threatened species, then it might wish to emphasize this particular value of its area, according to ecological criteria c"rarity"of the criteria and guidelines. In this case priority should be given (beside mandatory information on area, location, status of the PA etc) to fields like "List of regionally important species", "main plant assemblages", "main fauna populations" ; but fields like "subsistence uses" are, although of course interesting, less important to justify the listing of the PA under SPAW

optional fields (interesting information but not directly linked with any criteria of the criteria and guidelines),

fields with little added-value (either redundant with other ones, almost impossible to fill and/or very difficult for reviewers to interpret),

Our goal was to include in priority information needed to support the listing requirements. This to alleviate the burden, but also to ensure a core of comparable contents (i.e a set of information or metrics that all sites can provide, useful especially to develop a regional database).

Please find attached the result of our collective brainstorming. As you can see, the format is shorter ; some chapters have been merged ( 7 "Legal framework", 8 "Management" and a part of the 9 "Available ressources" now are one: "Management" for example). In other chapters, we detailed more precisely the data requested : the chapter is then longer, but it doesn't take more time to provide information! We created some new fields like "Available resources (human, physical, financial)" in the management framework. Some other fields, hard to complete and considered as no relevant, or with little added value, were deleted, such as "lenght of beaches". Globally, the gain of time to complete the new report is significant.

You will find below some exchanges between us for information.

I look forward to hearing your thoughts, comments and inputs on this revised format. The objective is to have a new version of the format to be presented at SPAW COP 6 in October along with the report on the implementation of the Pilot Project.

It means for us to get all your thoughts before the beginning of july (friday, 2nd).

Thank you for your feedbacks, and a huge thanks to all the volunteers that participated in revising the format!

Best regards,

for the Secretariat,  
Franck Gourdin  
Programme Officer  
CAR-SPAW-RAC

Dear members of the PA criteria e-group,

I just wanted to thank you for your efforts and all your inputs since the end of 2009.

And it was not a easy task too to synthetize and compile all the comments.

I really think we did a good job all together revising and simplifying the annotated format for reports on PA to be listed under SPAW.

Now it is more simple, and a user-friendly tool that really provides help and guidance to managers and countries officers

when they want to prepare the submission of a PA to listing under SPAW.

This new format will be presented to the next COP 6Â in october along with the report on the implementation of the Pilot Project.

So, once again, thank you so much for your help!

Best regards

For the Secretariat,

Franck Gourdin

Programme Officer
